- The only nutritional supplement with a proprietary chewable formula containing colostrum, β -glucan and modified citrus pectin*

FEATURES:

- Gluten-free
- Suitable for vegetarians
- Free from soy, artificial flavors, artificial colors, MSG, preservatives
- Contains naturally-sourced ingredients

WHAT MAKES THIS PRODUCT SPECIAL?

POINT OF CONVENIENCE:

ImmunoSTART is great tasting chewable tablet making it ideal for those that have challenges swallowing pills or enjoy chewing a supplement.

WHO IS IT FOR?

- Consumers looking to maintain a healthy immune system year around through immune modulation.
- Parents and grandparents looking for immune support for their children/grandchildren age 4 and up.

WHAT MAKES IT UNIQUE?

- Colostrum, a key ingredient in ImmunoSTART, contains various immune factors, including immunoglobulins.
- Immunoglobulin's (Ig) are one of nature's amazing antibodies that may raise immune cell counts, which is vital to having a normal immune response when your immune system is challenged.*

WHAT IT IS NOT:

This is not a multivitamin. It is not a gummy product.

TOP FAQ:

1. What is colostrum?

The colostrum in ImmunoSTART is bovine pre-milk taken in the first six hours after a calf is born. Our ImmunoSTART tablets contain certified Prime Colostrum. Colostrum is beneficial because it includes immunoglobulins that help support the immune system.*

2. Why is Modified Citrus Pectin an important ingredient in ImmunoSTART?

Modified Citrus Pectin (MCP) has been scientifically linked to immune support and is a source of Galacturonic Acid. It is a citrus pectin which has been modified to be more easily digested and utilized by the human body. The fiber that you see on the inside of citrus peels contain long chains of polysaccharides. By modifying this fiber so that it can be more easily digested and utilized, we provide different types of saccharides that have different benefits.

3. What are immunoglobulins?

Immunoglobulin's (Ig) are one of nature's amazing antibodies. Known to raise immune cell counts which is vital to having a normal immune response when your immune system is challenged.

4. If I'm lactose intolerant can I use this product?

ImmunoSTART does contain a small amount of lactose - 0.0148 g/tablet. This is well below the 12g level usually associated with lactose sensitivity as set by the World Health Organization (WHO). Individuals with allergies or sensitivities to any ingredients in our products should always consult their personal physician before use.

5. If I'm allergic to milk can I use this product?

There is no casein in ImmunoSTART. People who are allergic to milk are actually allergic to casein not lactose. Individuals with allergies or sensitivities to any ingredients in our products should always consult their personal physician before use.

6. My ImmunoSTART tablets sometimes change color or spot. Is the product still good?

The ImmunoSTART formula includes all-natural ingredients. Some of these ingredients are apt to be affected by humidity, which can cause ImmunoSTART tablets to spot or change color. This is a natural phenomenon and does not affect the efficacy or safety of the product. As with any product, always check the expiration date that is provided on every Mannatech product to be sure the product is fresh and will provide optimal amount of nutrients.

DIRECTIONS:

Chew one tablet twice a day.
