

MANNACLEANSE™
(SKU 36101)
PRODUCT TRAINING SHEET

PRODUCT BASICS

PRODUCT DESCRIPTION: A sluggish feeling can mean your digestive tract isn't working its best. So, help ensure the natural health of your gut with MannaCLEANSE capsules that help support a healthy environment in the intestinal tract so you can feel great.*

With a combination of natural fibers, herbs, fatty acids and probiotics, MannaCLEANSE can help provide a healthy environment for your lower digestive tract.*

BENEFITS:

- Supports the natural ecology of the intestines.*
- Supports the body's abilities to fully breakdown food particles.*
- Combines natural fibers, herbs, fatty acids and probiotics to help provide a healthy environment for the intestinal tract.*
- Supplies oat fiber, psyllium and plant cellulose.*
- Supplies herbs like ginger root, rosemary and peppermint.*
- Furnishes the intestinal tract with Ambrotose® Complex, fatty acids, digestive enzymes and beneficial microflora.*

FEATURES:

- Gluten-free
- Dairy-free
- Suitable for vegetarians
- Free from preservatives and artificial colors

WHAT MAKES THIS PRODUCT SPECIAL?

WHO IS IT FOR?

- Individuals who feel sluggish after eating and need to support the natural ecology of the intestines.

TOP FAQ:

1. What are beneficial micro flora?

Beneficial micro flora are healthy bacteria in the digestive system (primarily the colon) that are an important component of overall health.*

2. What are probiotics, and why are they important?

Probiotics are dietary living microorganisms that contribute to the health and balance of the intestinal tract. Food sterilization and preservatives may decrease the levels of these beneficial bacteria in your foods. Probiotics may help keep your digestive system running smoothly by helping to break down food and processing waste.*

3. Why is proper colon ecology of the intestines important?

Proper colon ecology is necessary for gastrointestinal and overall health. Our MannaCLEANSE capsules combine natural fibers, oils, herbs and probiotics to help support a healthy environment for the intestinal tract.*

4. What are Glycans?

Glycans (or Glyconutrients) are beneficial plant saccharides found in nature (saccharide is a formal name for sugar). Mannatech sources their Glycans from the inner leaf of the Aloe vera plant, but there are more than 200 plant saccharides currently known to science. The majority of plant saccharides are not sweet, and they do not raise your blood sugar. Typically, when people hear “sugar” they think of processed white table sugar, which is a disaccharide. Mannatech does not use table sugar in Ambrotose products. Moreover, Mannatech uses specific plant-based sugars/saccharides that are known for beneficial health support.*

5. Why are Glycans important to your health?

Glycans are beneficial saccharides found in nature, shown to support several extremely important functions for human health, beginning with cellular communication. Several scientific studies have shown that Glycans can improve many aspects of brain function, cognitive function, memory, attentiveness and mood. In addition, scientific studies on Glycans have shown that they act as a prebiotic which can support healthy digestive function and a healthy gastrointestinal tract. To maintain optimal internal functions, you need optimal cellular communication in many systems of your body.*

DIRECTIONS: Take two capsules two times daily with at least 8 fl. oz. of water. To achieve maximum benefits and effectiveness, take MannaCLEANSE capsules with a full glass of water between meals.
