BENEFITS

Over the past 20 years, Mannatech has invested millions of dollars into research and validation in developing Ambrotose products. Numerous studies have been published in peer-reviewed journals about Ambrotose powders^{††}, indicating that Ambrotose LIFE can:

- Support cell-to-cell communication through a blend of specific plant saccharides including Glycans.
- May enhance recall and recognition memory.
- Improve mood and decrease irritability.
- Help support proper digestive system function.

KEY POINT

Trillions of cells in your body communicate with each other to get exactly what they need, but age, stress, unhealthy eating and exposure to our toxic world can impair that ability. Supplementing with Glycans, like those found in Ambrotose LIFE, may help your cells communicate better, so they—and you—can be at your healthiest.
