

Reinventing hydration.

Premium hydration and immune support.*

Blue Water™ is sourced from a Costa Rican volcanic aquifer located in one of the world's rare "blue zones" — global regions known for having exceptionally longer living and healthier populations. The water is naturally filtered by its long journey through igneous "fire rock," then infused with a crisp fruit flavor, fresh, juicy Aloe vera pulp and electrolytes. The 100% Aloe pulp contains polysaccharides and prebiotics to hydrate, soothe and benefit overall well-being through the support of immune function and hydration.*

Benefits of Blue Water with Aloe pulp:

- Supports healthy immune function.*
- Supports healthy digestion and a healthy microbiome.*
- Supports deep hydration at the cellular level.*
- Provides deep hydration to support more radiant, luminous skin.*
- Supports nutrient absorption, like vitamins C and E.*
- Supports overall wellness.*

FUN FACT

Our aquifer is filled with delicious water that has cascaded through the mountain regions of the "Rincon de la Vieja" volcano, famous for the legend of Curubandá, the tribal princess for whom the volcano is named. After losing her beloved and son, she lived out her life, heartbroken, on the rim of the volcano where legend has it, she acquired healing powers. For years people came seeking the "Corner of the Old woman" to find her and drink the water, now we are bringing a little corner of that world right to you!
