

Enzymes to Help Support Digestion

For a Happier Tummy

Not actual size.

GI-Zyme® capsules are formulated to **help improve digestion** so you can process foods better. The capsules contain certain enzymes used by the body and are formulated to **help your system break down ingredients** you may have difficulty metabolising.

Taking GI-Zyme before meals may help you digest certain foods better so you can have a more complete diet.

Help your body digest better by taking GI-Zyme today!

Benefits:

- Formulated to help improve digestion.
- Formulated to assist in breaking down proteins, fats and carbohydrates.
- Aloe, beet and bromelain have anti-inflammatory properties.
- Ginger helps to relieve digestive upset including lack of appetite, nausea, digestive spasms, indigestion, dyspepsia, and flatulent colic (carminative).

FUN FACT

Enzymes help accelerate chemical reactions in your body. This is why the right ones may support healthy digestion and proper metabolism of foods.
