

Support the Balance of Your Beneficial Bacteria

Tasty and convenient, GI-ProBalance® sachets are designed to nourish your gut with 8 strains of probiotics. GI-ProBalance supports the natural balance of good bacteria in your gut microbiome and improves the functioning of the digestive tract. What matters are the strains of bacteria, the dosage and their health benefits. GI-ProBalance is specially formulated with a MannaBiotic™ Blend consisting of 8 powerful Lactobacillus, Bifidobacterium, and Streptococcus strains totalling 8,5 Billion CFU.[‡] Taking these probiotics will help to recolonize areas where they normally would occur. Lactobacillus specifically help to stabilize the mucosal barrier and to decrease intestinal permeability.

GI-ProBalance sachets benefits:

- Bifidobacteria and lactobacillus are considered beneficial bacteria to maintain healthy digestion.
- May support the body against occasional intestinal disturbances and typical, occasional digestive upsets
- Supplement natural probiotic levels that might fluctuate due to normal aging, diet or other normal digestive issues.
- Contain Acid-Resistant Probiotic Strains.
- Aloe has anti-inflammatory, antioxidant, detoxification and immune-boosting properties.
- When ingested, the bulk of tragacanth stretches the intestinal wall, increasing peristalsis. It increases stool mass and decreases gastrointestinal (GI) transit time.
- Larch arabinogalactan has immune-boosting properties

FUN FACT

You have more than 100 trillion microorganisms living inside and on you --mainly in your digestive tract or "gut." Lumped together, they'd weigh about six pounds --as much as a newborn baby.[†]

[‡]Contains 8,5 Billion CFU organism (at time of manufacture)
