

THE WORLD'S GREATEST ALOE

With Mannatech's exclusive farming rights and unique processing techniques Mannatech has created the purest aloe on the planet. Mannatech has worked consistently for over a decade to produce the most potent, stable and extraordinary aloe extract in the world.

"Our patented process for isolating and stabilising acemannan makes us the provider of the highest-grade aloe on the planet."

- Dr Steve Nugent

Mannatech's Chief Health and Nutrition Officer and Chairman of the Mannatech Global Scientific Advisory Board.

MANNATECH'S COMPETITIVE EDGE

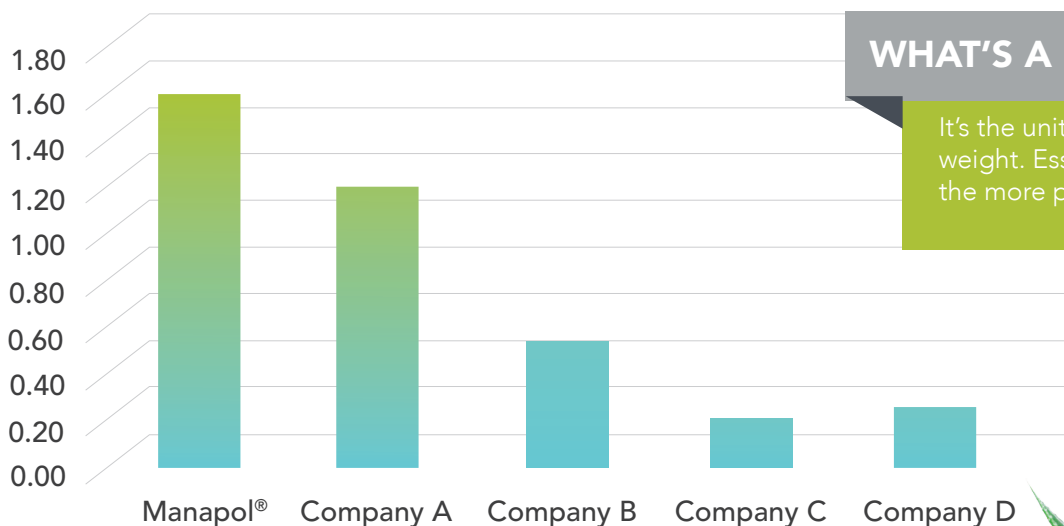

Manapol is the heart of Mannatech and the best kept secret in the industry!

- Exclusive extraction technology owned and used solely by Mannatech.
- Harvested from the ultra-rich volcanic soil of Costa Rica for extra purity.
- Hand harvested and hand filleted to protect the leaf's inner gel.
- Unique processing method to create a richer and more stable amount of acemannan.
- Highest concentration of acetylated acemannan for greater immune support.
- Highest quality and potency of acemannan compared to the competition.
- Cold process that uses NO heat, enzymes, charcoal, additives or preservatives.

Mannatech's Molecular Heavyweight

Mannatech's exclusive Manapol® is the **only commercially available aloe extract** that meets the 1-2 million Dalton definition set forth by CAS and USAN.*

COMPETITOR COMPARISON

WHAT'S A DALTON?

It's the unit used to show molecular weight. Essentially, the higher the Daltons, the more potent a substance!

*Chemical Abstract Service (CAS)—Division of the American Chemical Society (ACS)
United States Adopted Names Council (USAN)—Division of the American Medical Association (AMA)

MANNATECH'S EXCLUSIVE — SUPPLIER

100% Carbon Free

The farm generates its own electricity from biomass.

60

Over 60 years experience.

Continuous improvement of the plantation through genetic work, cross-pollination and better farming practices.

The special care and cultivation that goes into each aloe plant ensures the aloe **stays potent from farm to bottle.**

WHAT'S ACEMANNAN?

It's a polysaccharide found in the inner gel of the aloe vera leaf. It's what gives the aloe its incredible ability to support cell-to-cell communication in the body.* However, the polysaccharide can be easily destroyed during harvesting and processing, resulting in a diluted product with a lower acemannan content. It's why Mannatech's superior farming techniques allow for the greatest amount of acemannan—by protecting the leaf's inner gel.

With Mannatech's exclusive farming rights and unique processing techniques, Mannatech has created the **purest, most potent and stable aloe on the planet.** You can't get a richer source of Glyconutrients or aloe anywhere in the world.

Better health starts with your cells. When cells talk to each other effectively, your entire body can benefit. One of the most natural sources in the world, aloe, has been proven to contain nutrients your cells can use to communicate better. With an added bonus of digestive support, it's a powder that helps your overall health from the cells up.*

Benefits:

- Supports cellular communication for overall better health.*
- Proprietary extraction provides a more potent, stable acemannan content for superior immune, brain and digestive support.*
- May provide gastrointestinal benefits.*
- Abundant source of Glyconutrients.

Recommended Use:

Take 1 scoop (0.5g) mixed with food or water, 1-2 times daily.

Ingredients:

Aloe Vera extract powder
