

THE WORLD'S GREATEST ALOE

NO OTHER COMPANY COMPARES

With Natural Aloe Costa Rica's superior farming practices and unique **Acemannan** processing techniques, **no other company can come close** to creating what Mannatech has—the purest Aloe on the planet. Mannatech has partnered with Natural Aloe Costa Rica for over a decade to help produce **the most potent, stable and extraordinary** aloe extract in the world.

WHAT IS ACEMANNAN?

- It's a polysaccharide found in the inner gel of the aloe vera leaf.
- It's what gives the Aloe its incredible **ability to support cell-to-cell communication in the body.***
- It's a great source of prebiotic fiber.*

The polysaccharide can be easily destroyed during harvesting and processing, resulting in an inferior product with essentially no acemannan content. It's why **superior farming techniques and highly developed processing methods allow for the greatest amount of Acemannan**—by creating an aloe extract that is more similar to native inner leaf gel than any other aloe in the world.

Mannatech's Aloe Vera, Manapol® powder, is specially grown in the volcanic, nutrient-rich soils of Costa Rica. It is processed in a way specific to **stabilizing the Acemannan content of Manapol**, which is exclusive only to Mannatech.

MANNATECH IS THE ONLY COMPANY IN THE WORLD that has an aloe vera ingredient that contains Acemannan. Other companies may have aloe vera powders, but their processing methods destroy the Acemannan component.

Mannatech's Competitive Edge

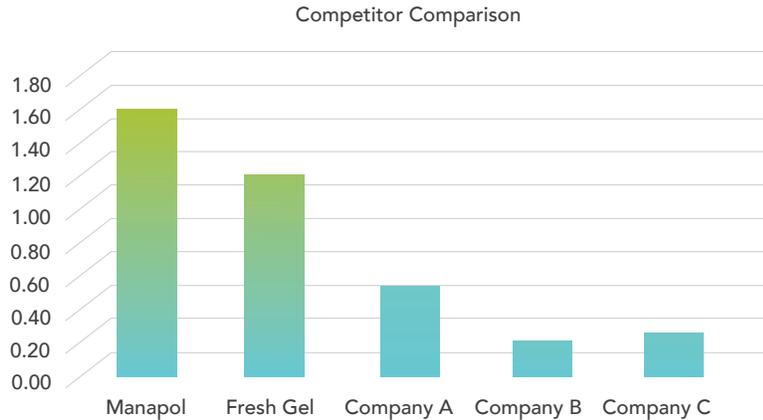

- **Exclusive extraction technology** used solely by Mannatech.
- **Unique processing method** to create a richer and more stable amount of Acemannan.
- Hand **harvested** and hand **filleted** to protect the leaf's inner gel.
- Cold process that uses **NO** heat, **NO** enzymes, **NO** charcoal, **NO** additives and **NO** preservatives.
- **Highest quality and potency** of Acemannan compared to the competition.
- Continuous investments to our **state-of-the-art-technology** that focuses on a balance of science and nature.

Manapol meets Molecular Weight Definition

Mannatech's exclusive Manapol is the **only commercially available Aloe extract** that meets the 1-2 million Dalton definition set forth by CAS and USAN.*

What's a Dalton?

It's the unit used to show molecular weight. Essentially, the higher the Daltons, the larger the molecule!

*Chemical Abstract Service (CAS)—Division of the American Chemical Society (ACS)
United States Adopted Names Council (USAN)—Division of the American Medical Association (AMA)

Mannatech's Exclusive Partner—Natural Aloe Costa Rica

100% Carbon Free

The farm generates its own electricity from biomass.

60

Over 60 years experience.

Continuous improvement of the plantation through genetic work, cross-pollination and better farming practices.

*The special care and cultivation that goes into each aloe plant at Natural Aloe Costa Rica ensures the aloe **stays potent from farm to bottle.***

Perfect climate for Aloe to thrive.

Rich volcanic soil that provides unique nutrients not found anywhere else.

The clean air of Costa Rica keeps the Aloe pure and free from pollution.

Results in a clean Aloe leaf with the highest concentration of Acemannan!

In conjunction with our partner, Natural Aloe Costa Rica, Mannatech continues to provide naturally sourced nutrition worldwide.

THE COMPETITION CAN'T COME CLOSE.
